

Today's practice was RBAC, assigning role assignments of reader, contributor and owner. I created 2 resource groups, one RG-Sales and one RG-Marketing.

RG-Sales containing users:

Renata(reader)

Joao(contributor)

Ana.(owner)

RG-Marketing containing users:

Carla(reader)

Luiza(contributor)

Paulo(owner)

<input type="checkbox"/>	 Renata	renata@paulohen... 	Member	No

The creation of a resource was tested for each user, in this case a storage account, to test whether the role assignment was working correctly, according to its permissions.

Below are screenshots of the step-by-step process for each user in creating a westeurope storage account.

AND END of practice, I thank those who read this far, day after day I am evolving and learning more to be successful in the AZ-104.

Thank you very much!!!
